

2025

Dear PBS Customer,

You recently requested a (Material) Safety Data Sheet ((M)SDS) for one or more of the following products that you purchase from Performance Building Solutions (PS):

DuPont™ Thermax™ Brand Insulation
DuPont™ Tuff-R™ (ci) Polyisocyanurate Insulation
DuPont™ Super Tuff-R™ Polyisocyanurate Insulation

These products are globally defined as articles not requiring SDSs according to chemical laws:

United States: [1910.1200 - Hazard Communication. | Occupational Safety and Health Administration \(osha.gov\)](https://www.osha.gov/1910.1200-hazard-communication)

- 29 CFR 1910.1200(c), "*Article* means a manufactured item other than a fluid or particle: (i) which is formed to a specific shape or design during manufacture; (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (iii) which under normal conditions of use does not release more than very small quantities, *e.g.*, minute or trace amounts of a hazardous chemical (as determined under paragraph (d) of this section), and does not pose a physical hazard or health risk to employees." Further, 29 CFR 1910.1200(b) (6) (v), provides that the regulation does not apply to articles. Therefore, we are not required to provide an (M)SDS under the provisions of these regulations.

Canada: [Reference Manual for the WHMIS Requirements of the Hazardous Products Act and Controlled Products Regulations - Canada.ca](https://www.ccohs.ca/osh/safety/topics/whmis2015/reference-manual-for-the-whmis-requirements-of-the-hazardous-products-act-and-controlled-products-regulations/)

- A 'manufactured article' is formed to a specific shape or design; its use depends on this design, and under normal conditions of use will not cause a person to be exposed to a controlled product. Examples of manufactured articles are a car battery or a mercury thermometer. Any product which meets the definition of an "article," is exempt from the requirements of the WHMIS Standard.

The products listed above do not release or otherwise result in exposure to a hazardous chemical under the intended conditions of use and meet all other listed requirements of an article.

Manufacturers and distributors are under no regulatory obligation to supply article SDS's for these products in the US or Canada. Please see the Product Information Sheet and other documents for guidance on proper handling, use, and storage, or contact our Building Knowledge Center for additional information.

Please keep this letter available, in lieu of (M)SDSs, as evidence of the above exemption.

DuPont encourages its customers to review their applications of DuPont products from the standpoint of human health and environmental quality. To help prevent used of DuPont products in ways for which such products were not intended or tested, DuPont personnel are available to assist in dealing with ecological and product safety considerations.
